

1 5 kw solar inverter factory in Argentina

Why is the inverter market growing in Argentina?

The Argentina inverter market is experiencing significant growth owing to the rising demand for renewable energy sources such as solar and wind power. Inverters play a vital role in converting DC power generated by solar panels or wind turbines into usable AC power for commercial and residential applications.

Where is Sungrow's largest solar plant located?

Sungrow announced that a 100.1 MWp solar plant utilizing the Company's 1500Vdc central inverter solutions came online in Cafayate, Salta Province, Argentina, demonstrating the Company's dedicated contribution to the largest solar plant in one of LATAM's most booming solar energy regions.

What is Sungrow doing with 400 MW solar park in Chile?

Early this May, Sungrow secured deal for 400 MW solar park in Chile, utilizing the solution as well. The solar park was selected by Argentinean government in the second round (Ronda 1.5) of the country's RenovAr auction program for large-scale renewable energy plants.

How many GWh will Argentinean solar power supply a year?

It is expected to supply approximately 240 GWh of clean power to the Argentinean power system per year and bring hundreds of job creations for local communities, contributing to the national renewable ambition of the emerging solar hub.

Comprehensive Product Portfolio From 5W portable panels to 550W high-efficiency modules, from residential systems to commercial solar containers, we offer complete solar solutions. Our product ...
