

150-foot folding containers used in Oceania ports

How popular is a foldable container?

As previously noted, the foldable container is now used at more than 60 depots and ports and on 15 shipping lines and growing in popularity all the time. "The shipping industry is typically very conservative," said Broekhuis.

What is a foldable cargo container?

A foldable cargo container looks like a traditional container, but it offers the opportunity of saving space when it's not being used. This type of container can be folded vertically and horizontally with the port's standard machinery and, of course, handled with container spreaders. Why do we need to save space in shipping cargo?

What is a 4fold foldable container?

So it is that the 4FOLD foldable container from Holland Container Innovations (HCI) is providing a novel solution that not only reduces CO2 but offers a number of additional benefits -- more efficient to ship empties back (by a ratio of four to one!), space saving, and faster handling at the terminal.

How many foldable containers are needed for the Inland network?

Out of a total of about 5000 containers, an estimated fleet and critical mass of just 695 foldable containers are required for the inland network under study (and the rest of the containers being conventional ones), with a 71% load factor on the back haul.

If the foldable container is so good, why aren't there hundreds of them in ports around the world? Here we explain some considerations about the implementation of foldable containers in ...

According to a Bloomberg report, about 27% of the 20-foot equivalent shipping containers that passed through the world's ports were empty -- contributing to about \$20 billion in ...

The container handling equipment used in ports and warehouses, as well as related facilities adapted to these changes as well. Currently, the most commonly used container sizes are ...

Staxxon designs foldable intermodal shipping containers, a solution designed to tackle "empty running", whereby empty containers clog ports and hurt supply.

At container terminals, SeaFold containers serve as a strategic solution for alleviating both current and anticipated port congestion. Their compact nature when collapsed liberates valuable ...

The global cost of repositioning containers is enormous and foldable containers have been proposed as one way to address the problem. This study investigates foldable shipping containers ...

GenFlat collapsible containers ("GenFlats") are built from mildsteel and Corten, giving them a strength and rigidity that exceeds industry standards. GenFlat combines the standard ...
