

# 2025 New Factory Outdoor Energy Storage

Is 2025 a good year for energy storage installations?

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From price swings and relentless technological advancements to shifting policy headwinds and tailwinds, 2025 proved to be anything but uneventful.

What will energy storage be like in 2035?

Energy storage installations globally will keep gaining momentum over the next decade as other markets pick up pace. BloombergNEF expects cumulative energy storage capacity in 2035 to reach 2 terawatts (7.3 terawatt-hours) - eight times the level in 2025. Utility-scale projects continue to dominate applications.

Will energy storage grow in 2024?

The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours (MWh), year-over-year in 2024 and are expected to go beyond the terawatt-hour mark before 2030.

Will energy storage capacity reach 2 terawatts in 2035?

BloombergNEF expects cumulative energy storage capacity in 2035 to reach 2 terawatts (7.3 terawatt-hours) - eight times the level in 2025. Utility-scale projects continue to dominate applications. See 2H 2025 Energy Storage Market Outlook for more details.

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From price swings ...

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil. Annual ...

The global energy storage market achieved substantial 43% year-on-year growth in 2025, with 106 GW of new capacity added worldwide. This represents a significant increase from the 73 ...

Tesla's another Megafactory which produces energy storage products, officially went into production today. The Shanghai facility is Tesla's first Megafactory outside the United States and ...

The inauguration ceremony for U.S. carmaker Tesla's Shanghai energy storage megafactory was held on Tuesday. As a multinational company that initially built its business empire ...

This facility marks Tesla's first Megapack factory outside the United States and adds to its existing Shanghai Gigafactory operations. Dedicated to producing the large-scale Megapack ...

Explore what 2025 holds for clean energy--from solar and wind growth to storage innovations and grid modernization. Key insights from FFI Solutions.

# 2025 New Factory Outdoor Energy Storage

With developers continuing to add new capacity, including 9.2 GW of new lithium-ion battery storage capacity in 2024 through November 2024 and comparable levels of growth expected ...

This photo shows a production launch ceremony of U.S. carmaker Tesla's Megafactory in Shanghai, east China, Feb. 11, 2025. U.S. carmaker Tesla's new Megafactory in Shanghai, ...

By the end of September 2025, China's new energy storage installed capacity had reached 103 GW, over 30 times higher than at the end of the 13th Five-Year Plan.
