

Ankara electric grid

Will Türkiye build a green grid by 2030?

In March 2023, Türkiye announced its plan to invest \$10 billion to build a green grid by 2030. The ministry illuminated the necessity of the grid's upgrades to accommodate the different clean energy installations. This includes a plan to increase the installed electricity capacity to 190 GW, of which 60 GW will be renewable energy, by 2035.

How big is Turkey's electricity market?

Source: Ministry of Energy and Natural Resources, State Institute of Statistics. Türkiye, with an electric power generation capacity of approximately 105 GW, is Europe's sixth-largest electricity market and the 14th largest in the world.

Is Türkiye a regulated electricity market?

Türkiye has a semi-liberalized and moderately regulated market. Energy Exchange Istanbul (EXIST) is Türkiye's electricity spot market, which manages day-ahead and intraday markets where 40% of electricity is traded among 854 market participants. EXIST's website features electricity prices in real time.
