

Are there many new energy solar sites in Brasilia

Law No. 6891/2021 has stipulated that no less than 50% of energy consumption of the public buildings and services in the FD shall be generated by renewable energy by the end of 2026, and no less than ...

The Arinos Solar Park, developed by Enel Green Power, a company of the Enel Group, and operational since early 2025, marks the company's first power generation site of this scale in...

Brazil's National Interconnected System (SIN) registered a new solar power generation record when the country's solar farms hit 37,869 MW on March 14, the Ministry of Mines and Energy ...

O ranking re#250;ne os 20 empreendimentos de gera#231;#227;o centralizada com os melhores indicadores do ano, com destaque para projetos desenvolvidos por empresas como Lightsource bp, ...

These records highlight the growing importance of solar energy in Brazil's energy landscape and its potential to soon become a major force in the country's energy transition.

As of June 30, 2025, there were 122 GW of planned utility-scale solar facilities listed in ANEEL's data. However, only 6 GW of the planned projects are currently under construction.

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years.

Furthermore, the number of plants also reached a historic milestone last year: 301 new plants in operation, of which more than half of the installed power came from photovoltaic sources.

Overall, 301 new power plants were installed across 16 Brazilian States, of which over 91% were renewable power plants.

Brazil is expected to add 13.2 GW of solar capacity in 2025, but the market is showing early signs of slowing as new large-scale projects face delays and distributed generation encounters...
