

Australia's clean energy transition could fall short without rapid development of long-duration energy storage, according to a new industry roadmap released by the International ...

Grid battery projects in Australia are getting bigger and bigger. Here is an updated list of the 15 biggest in terms of storage that have been built, contracted and committed.

The Australia Energy Storage on The Power Generation Side Market is poised for significant growth over the next 5-10 years, driven by rising consumer demand, technological ...

Amid fits and starts, Australia's energy transition turned a big corner in 2025, as renewables shot past fossil fuels despite demand records.

Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation reaching 1,699MW average output while battery...

Australia's energy market hit a turning point in 2025. As rooftop solar growth slowed, battery installations surged to record levels, reshaping how homes and the grid use electricity. This ...

Currently storage of electrical energy in Australia consists of a small number of pumped hydroelectric facilities and grid-scale batteries, and a diversity of battery storage systems at small ...

The Australian Energy Market Operator's (AEMO) latest Quarterly Energy Dynamics report reveals that battery storage deployment accelerated during Q3 2025, with 2,936MW of new ...

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, stabilizing the grid, and driving the nation's clean ...

The paper reviews energy storage technologies and their applicability to the Australian National Electricity Market (NEM). The increasing dynamic variability between maximum and ...
