

Brazil's largest battery energy storage project

Brazil's capacity reserve auction for battery energy storage systems (BESS), first anticipated in 2024, moved closer to execution in 2025 as projects advanced and auction rules were...

Multiple Chinese companies, including Huawei, are expected to bid in an upcoming Brazilian energy-storage auction.

Brazil's federal government will launch its first major battery energy storage system (BESS) tender in April 2026, targeting 2 GW (~8 GWh) of capacity and mobilizing over USD 2 billion ...

Brazilian mining giant Vale is partnering with Siemens and MicroPower Comerc on a 5MW/10MWh lithium-ion battery system at a large ...

Mining giant Vale has unveiled the largest battery energy storage system (BESS) in Brazil for an industrial user, slashing peak power costs and ...

Unicamp, in São Paulo, Brazil, inaugurated the CampusGrid solar-plus-storage project on its Barão Geraldo campus in Campinas on Nov. 21, 2024. The microgrid combines a 565 kWp ...

As Latin America's largest economy steps closer to mainstreaming battery energy storage, the world will be watching how Brazil balances ambition with regulatory clarity -- and ...

Aggreko is implementing the hybridization of 24 off-grid power plants, including what will be the country's largest battery energy storage deployment -- 119 MWh distributed across...

The construction of this energy storage system is planned to be used for industrial "peak cutting" to save costs for Vale. The project will become the largest battery energy storage system in ...

ISO CTEEP claimed it as the first large-scale battery energy storage system (BESS) on Brazil's transmission grid. The project required a total US\$27 ...

Brazil s largest battery energy storage project
