

Central africa cost savings

Why are major investments needed in Central Africa?

Major investments are needed for the construction of new road sections, ports, logistics platforms and border posts in Central Africa. National coordination and regional collaboration on transit is facing difficulties in Central Africa.

Why are inventory costs so high in Central Africa?

Thus, the longer the transit time, the higher the inventory costs. For some landlocked countries in Central Africa, transport costs represent 35% of the value of exports, and more than 45% of the value of imports.

How does international transit affect Central African countries' competitiveness?

The costs and delays associated to the international transit of goods have a significant impact on Central African countries' competitiveness.

Why do economic operators complain about poor roads in Central Africa?

Economic operators in Central Africa complain about the poor condition of roads, which can lead to premature or accelerated wear and tear of road vehicles, increase breakdowns, and make certain stretches unsafe for driving. The lack of bridges over some rivers is also an obstacle to the international transit of goods.

ARV price reductions could free up funds that - if strategically invested - would help countries move closer toward the elimination of HIV.
