How did Honduras respond to the energy crisis?

In 1994, Honduras faced a severe energy crisis, which the government responded to by passing the Framework Law of the Electricity Subsector, permitting the private sector to participate in electricity generation. In 2013, Decree 138 was passed to promote investment in solar PV plants by providing preferential pricing.

What does the Secretariat of energy do in Honduras?

The Secretariat of Energy (SEN) is the primary government body responsible for overseeing the energy sector in Honduras, including mini-grid development. It sets national energy policies, plans rural electrification strategies, and coordinates with stakeholders to implement mini-grid projects.

Does Honduras have a power grid?

Honduras's power grid is extensively developed in all departments except the easternmost department, Gracias a Dios. Honduras has granted distribution concessions to 7 utilities nationwide, with the state-owned Empresa Nacional de Energía Eléctrica (ENEE) managing nearly 99% of the electricity grid. Honduras has the lowest electricity access rates.

What are Honduras' electrification goals?

Honduras's electrification goals are anchored in the Universal Access to Electricity Policy for Honduras (PAUEH). Electrify all schools and hospitals nationwide by 2027. Achieve 100% electrification by 2030 and continue improving electricity service until 2050.

Since September 2015, Honduras made the conditional pledge -- through its Nationally Determined Contribution -- of reducing its CO2 emissions 15% by 2030 (compared to those in the ...

This report presents the work conducted by the National Renewable Energy Laboratory (NREL) on the rural electrification of Honduras, focusing particularly on schools and clinics and ...
