

In this article, with the help of charts and key statistical data, we reveal the latest solar power statistics that demonstrate how the industry has grown so far, and the outlook and potential for ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

These statistics showcase the current capabilities of solar technology, from panel efficiency rates and lifespan to emerging innovations in hybrid systems and energy storage, ...

Berkeley Lab collects, cleans, and publishes project-level data on distributed\* solar and distributed solar+storage systems in the United States. The data are compiled from a variety of sources, ...

Solar generation rose 23% in 2021, and the industry is expected to continue to grow over the next decade. Women hold 40% of full-time positions in the global solar workforce. Nearly 75% of...

Check your daily solar and wind generation forecast. Climate Central's WeatherPower tool provides a multi-day forecast of solar and wind generation by state, country, or congressional...

Data was obtained from various sources, including an IRENA questionnaire, official national statistics, industry association reports, consultant reports and news articles.

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

All solar segments set annual installation records except for residential solar, which experienced its lowest year of new capacity since 2021. The factors driving installation growth in ...
