

Daily wind power generation query

What is wind power?

The Wind Power is a comprehensive database of detailed raw statistics on the rapidly growing sphere of wind energy and its supporting markets. It contains data about wind farms, turbines, manufacturers, developers, operators, owners and also pictures and cartographical data

How is electricity generation from wind measured?

Annual electricity generation from wind is measured in terawatt-hours (TWh) per year. This includes both onshore and offshore wind sources. Data source: Ember (2026); Energy Institute - Statistical Review of World Energy (2025) - Learn more about this data Measured in terawatt-hours.

How do I create a graphic forecasting daily wind or solar electricity generation?

To create a graphic displaying daily wind or solar electricity generation in your media market, first select the state, then choose the media market, county, or congressional district (maximum of three per graphic). What do these selections mean?

How is wind energy forecasted?

Our basic models take into account wind speed and direction, temperature, and other meteorological variables to predict the wind power output over the next few days in an hourly resolution.

Use WeatherPower graphics to show daily wind and solar electricity generation based on weather of the day and installed capacity in your area.

Annual electricity generation from wind is measured in terawatt-hours (TWh) per year. This includes both onshore and offshore wind sources.

This publication displays the Electricity System Operator's (ESO) wind generator availability in megawatts (MW) at a daily resolution for 2-14 days ahead.

Alberta: Monthly wind power forecast vs. actual comparison reports Ontario: Latest hour of generation Ontario: Daily hourly generation (scroll to bottom of table for wind plant) Ontario: Hourly ...

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more. A wind project ...

On some days, wind energy covers more than 100% of some Member State's electricity demand. Find out how much wind was in the power mix yesterday.

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

The Wind Power is a comprehensive database of detailed raw statistics on the rapidly growing sphere of wind
