

Delivery time of automated folding containers in Western Europe

Are automated ports the future of container shipping?

Automated ports are already an integral part of container shipping today and you might have touchpoints with automated processes in your daily business as well. Thanks to modernization, Hapag-Lloyd can guarantee faster transportation, greater safety and fewer damaged goods - benefiting every involved party.

Is Europe ready for port modernization?

While China has been considered a pioneer in the automation of container terminals for a long time, Europe has picked up the pace in terms of port modernization in recent years. All ports should aim for more automated and digitalized processes if they don't want to be left behind in international comparison.

How are containers stored in the Terminal Altenwerder?

Optimized container storage: The 26 storage blocks in the Terminal Altenwerder are each handled in parallel by two gantry cranes on rails - they substitute for each other when maintenance is required. Towing vehicles transport the containers between the storage blocks and the railway station and ensure a smooth process.

Are highly automated ports a futuristic idea?

Highly automated ports are no longer a futuristic idea. Semi-automated crane systems, driverless transport vehicles and automated container storage planning increase efficiency and simplify processes.

Highly automated ports are no longer a futuristic idea. Semi-automated crane systems, driverless transport vehicles and automated container storage planning increase efficiency and simplify processes. While China ...
