

Do you have a solar mount

Can I mount a solar panel on my own?

Yes, it is possible to mount a solar panel on your own, but this is not advisable due to the high risks associated with improper solar mounting and installation. The biggest risk of DIY solar panel mounting is an electrical fire caused by using the wrong materials to mount the solar panels.

What is a solar panel mount?

Solar panel mounts secure solar panels either to your roof or on the ground. Solar panel mounts typically account for 10% of the total solar panel installation cost. IronRidge and Unirac are the best options for roof and ground mount solar systems.

Do solar panels need mounting materials?

Solar panels need mounting materials that are corrosion-resistant and have insulating properties. Mounting solar panels with inadequate materials (such as wood) often causes arc flashes, and dangerous electrical discharges up to four times the temperature of the sun's surface (~35,312°F).

How to choose the right solar panel mounting system?

In conclusion, choosing the right solar panel mounting system will be a crucial step in your residential renewable energy journey. By considering your roof's suitability and the installation space on your property, you can select the mounting method best suited for your home, while maximizing safety and savings on electricity bills.

Learn how to choose the right solar panel mounts for your home in this comprehensive guide to solar panel roof mounts and ground-mounted solar panels.
