

Tajikistan's Ministry of Energy and Water Resources (MoEWR) has published a government resolution introducing new electricity tariffs that will take effect on February 1, 2026.

Tajikistan's electricity sector is almost solely based on hydropower and is characterised by seasonal surpluses and shortages, and a state-owned electric utility with financial viability issues.

Tajikistan is upgrading its transmission infrastructure to support domestic energy needs and regional exports. The 500 kV Datka-Sughd transmission line, developed under the CASA-1000 ...

These retail prices were collected in June 2025 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Tajikistan with 150 other countries. Historical quarterly ...

Winter has come early in Tajikistan, with the national power company, Barqi Tojik, notifying customers on September 21 that seasonal rationing of electricity would begin the following day "where ...

Starting from April 1, electricity prices in Tajikistan have increased once again. Residential customers now pay 15% more for electricity than they did previously. Experts believe the tariff hike is ...

Tajikistan increased electricity production by 12.2% in the first half of 2025, but unpaid electricity bills reached TJS 4.47bn (\$468mn) as of July, while electricity exports rose by 56.4% ...

Starting February 1, 2026, electricity tariffs in Tajikistan will increase, with unofficial sources indicating a 17% hike for residential customers.

The tariff hike comes on the heels of a previous bump in January 2024 and is just another piece of the puzzle in the ongoing dance of energy prices in the country. The new prices will ...
