

# Energy storage restrictions export

What are China's new export controls on LFP batteries?

The new export controls on the latest technology upgrades for LFP batteries, a sector where Chinese firms hold global dominance, reflect China's ongoing strategy of restricting exports of critical materials and technologies. Battery makers outside China have a new headache to worry about. Export controls on the latest LFP battery technology

Can China halt exports if there are discrepancies?

Chinese customs authorities will have the power to delay or halt shipments if any discrepancies or uncertainties arise regarding the nature of the exported goods. This latest move builds on China's earlier export controls on natural graphite, lithium iron phosphate (LFP) cathode active material (CAM), and lithium processing technologies.

Could a new export ban slow progress towards sustainability?

The proposed export ban comes at a critical moment in the global energy transition. With many industries attempting to accelerate their movement away from fossil fuels, such technological restrictions could potentially slow progress towards sustainability goals. Dr Tara Lindstedt, Chief Development Officer at InoBat, is an expert in this industry.

What challenges will China's energy-storage industry face in 2025?

China's energy-storage industry is facing challenges in 2025 due to the escalating US-China trade war and tariffs affecting exports to the US, its largest market. Analysts from WaterRock Energy Economics project a 10-20% reduction in capital spending in the sector this year.

China has announced new export control measures targeting a wide range of lithium battery technologies, materials, and manufacturing equipment. The decision, approved by the State ...

China's export controls on LFP shake up the global battery market; Tesla's success story in energy storage systems continues. Every week, the battery landscape shifts in fascinating ways -- ...

On October 9th, China's Ministry of Commerce (MOFCOM) announced the implementation of export control measures related to lithium batteries and synthetic graphite anode ...

Export restrictions, or restrictions imposed on goods at the time or point of exportation, can affect trade either explicitly or implicitly, depending on the nature of such restrictions. ... Niobium based materials ...

China Restricts Export of LFP BESS Technology Now The new export controls on the latest technology upgrades for LFP batteries, a sector where Chinese firms hold global dominance, ...

Announcement No.18 of 2025 of The Ministry of Commerce and The General Administration of Customs of The People's Republic of China Announcing the Decision to Implement ...

# Energy storage restrictions export

China to restrict battery and equipment exports China is preparing to tighten the flow of critical materials used in energy storage. The Asian giant, which currently dominates the global ...

The proposed export ban comes at a critical moment in the global energy transition. With many industries attempting to accelerate their movement away from fossil fuels, such technological ...

The Rising Tide of Trade Restrictions You know, the global energy storage market's growing at 18% annually - but here's the kicker. Over 35% of manufacturers report facing customs complications ...

China's energy-storage industry is facing challenges in 2025 due to the escalating US-China trade war and tariffs affecting exports to the US, its largest market.
