

First invitation to a large-capacity energy storage power station

With a planned photovoltaic capacity of 690 megawatts (MW) and battery storage of 380 MW, it is expected to be the largest solar project in the United States when fully operational.

On the Hawaiian island of Oahu, a large and sophisticated battery energy storage system recently came online, marking a key point in the state's efforts to move toward a future of 100% renewable energy.

This project represents China's first grid-level flywheel energy storage frequency regulation power station and is a key project in Shanxi Province, serving as one of the initial pilot demonstration ...

On October 10, 2025, China's first large-scale lithium-ion battery energy storage power station commenced operations in Guangxi Province. This project, which is located in the Nanning area, aims ...

The deployment of this world-first 600Ah+ energy storage power station is not only a technological milestone but also an industry signal: the era of large batteries for energy storage has ...

The Darden project joins a string of clean energy achievements in California, which added a record 7,000 MW of new capacity in 2024 and has reached 100% clean energy on 91% of ...

Advanced Clean Energy Storage uses a 220-megawatt bank of electrolyzers and intermittent renewable energy to produce hydrogen, store it in salt caverns, and deliver that hydrogen for future dispatchable ...

Owner Vistra Energy has announced the completion of work to expand its Moss Landing Energy Storage Facility in California, the world's largest lithium battery energy storage system ...

The U.S. DOE disbursed \$185M of American Recovery and Reinvestment Act funding to support 16 large-scale energy storage projects with a combined capacity of over 0.53 GW. 39

The world's first intelligent grid-forming photovoltaic and energy storage power station, tailored for ultra-high altitudes, low-temperatures and weak-grid scenarios, has been connected to ...
