How does EV charging infrastructure procurement work?

A variety of options for electric vehicle (EV) charging infrastructure exist, thereby creating a multifaceted infrastructure procurement process. The site host's specific characteristics and goals, such as utilization and demographics, can also influence the process.

Can a government subsidize a charging station?

Subsidizing platforms rather than manufacturers can promote stations installation. To address the "chicken-and-egg" dilemma in the electric vehicle (EV) market, the government intervenes by offering EV purchase subsidy to consumers and charging station construction subsidy to installers.

How do I choose a charging infrastructure?

The process of procuring charging infrastructure includes many other considerations, such as compliance, permitting, safety, ownership, signage, markings, and more. When choosing charging infrastructure, ensure that the manufacturer has complied with certification requirements, including testing the product with a certified testing body.

Which countries financed EV charging infrastructure in 2022?

In 2022, the Canada Infrastructure Bank declared a \$385 million investment in EV charging infrastructure. Poland also financed charging infrastructure after implementing a car subsidy plan in 2021.

Choosing the correct and optimal charging source for charging stations is another important point that project managers and policy-makers should consider. If the energy supply ...

Our innovative EV programs raise awareness, reduce up-front costs, make it easier for customers to charge electric vehicles on cost, low carbon energy a way that's good for grid.

To address the research questions and bridge gaps, we formulate a Stackelberg game involving the government and two charging station installers (an EV manufacturer and a charging ...
