

Green electricity apia

What has the EPC done for Samoa?

To date, works continue for further developments of its existing generation and distribution network. As mandated to generate, distribute and sell electricity supply to all of Samoa, the EPC has connected up to 99% of Samoa's population. Increased access by all people of Samoa, to quality and affordable electricity supply.

Does Samoa have energy security & sustainability?

The project will result in greater energy security and sustainability for Samoa. Samoa is a Pacific island country divided into the two main islands of Upolu and Savai'i and two minor outer islands, with a total population of 188,000 people. About 70% of the population lives on Upolu, the main island and location of the capital, Apia.

Why is Samoa launching a new electricity source?

The launching of a new electricity source that will benefit up to 5,000 families on the north-western side of the island of Upolu, is a milestone for Samoa's renewable energy efforts. It is also a significant contribution to the country's climate action commitments.

Will AI tip millions into 'energy poverty'?

Simply sign up to the Energy sector myFT Digest -- delivered directly to your inbox. Power-hungry AI risks tipping millions into "energy poverty" unless investors pour more money into renewables, according to Chinese wind turbine magnate Zhang Lei, who argued that the case for clean energy was now driven by mathematics rather than climate change.
