

How to rent photovoltaic panels

Are solar panels a lease or a PPA?

Maintenance: If you choose a solar lease or PPA, the leasing company owns the solar panel system and typically offers a service program to cover any maintenance issues that arise during the lease term. On the other hand, if you take out a solar loan to purchase your system, you'll be responsible for its maintenance.

Should you buy or lease solar panels?

Solar leases do provide a path to energy savings -- especially if the cost of utility electricity outpaces the escalator. However, buying solar panels has become the better deal in the last decade or so. Is it Better to Buy or Lease Solar Panels? There are a handful of ways to finance a solar system.

How much does a solar panel lease cost?

Solar panel leases cost between \$50 and \$250 per month, on average. The exact amount the homeowner pays depends on the amount of energy they use at home, the company supplying the lease, their location, and their credit score. The customer can choose between a number of financing options that best suit their needs.

Do I need a solar loan to install solar panels?

Ownership: You maintain ownership of your solar panel system with a solar loan, but you don't with a solar lease. Owning your panels with a solar loan means that you can take advantage of any available state and local rebates and incentives upon installation.
