

How is IGES Amsterdam transforming plastic to oil?

IGES Amsterdam started the construction of a plant transforming plastic to oil in March 2018. The construction of the plant is about to conclude, and road-ready fuel is scheduled to be produced by the end of 2018. IGES Amsterdam uses plastic feedstock that is polluted in such a way that it is not suitable for mechanical recycling.

When will IGES Amsterdam produce road-ready fuel?

The construction of the plant is about to conclude, and road-ready fuel is scheduled to be produced by the end of 2018. IGES Amsterdam uses plastic feedstock that is polluted in such a way that it is not suitable for mechanical recycling.

What is happening in IGES Amsterdam?

IGES Amsterdam started the construction of a plant transforming plastic to oil in March 2018. The construction of the plant is about to conclude, and road-ready fuel is scheduled to be produced by the end of 2018.

IGES Amsterdam uses plastic feedstock that is polluted in such a way that it is not suitable for mechanical recycling. These plastics are then transformed into fuel for the transportation industry.
