

Is battery balancing part of BMS

Does A Bms Balance Cells When Not charging? Importance of Cell Balancing Bms Balancing Methods So, How Does A Battery Balancer Work? A dedicated active balancer works exactly the same way that a BMS with active balancing works. A BMS is really a collection of several functional circuits that are all controlled by one primary circuit or microcontroller. So, an active balancer is basically the active balancing component of a BMS without anything else. See more on cellsaviors .b_ans
