

Latest information on recruitment of workers in photovoltaic panel factories

How do I find a job in the photovoltaic field?

One of the simplest methods to find job offers in the photovoltaic field is to browse job postings on dedicated websites, such as Indeed, Jooble, It, or Subito. Each of these currently lists over a thousand national-level job offers, with high demand for roles like electricians, designers, and sales professionals.

How many solar jobs are there?

In the early 2000s, solar jobs were largely niche, limited to a few specialised roles in research & development and small-scale installations. According to IRENA 2024 report, the renewable energy industry now supports over 16.2 million jobs worldwide, with over 7 million jobs in solar PV and heating/cooling alone.

How many solar jobs are there in 2023?

The solar energy sector is experiencing unprecedented growth, with over 7.1 million jobs in solar PV alone as of 2023. For professionals considering a career shift into renewable energy, solar offers pathways across R&D, manufacturing, project development, and operations.

How many photovoltaic workers are there in Italy?

Currently, Italy ranks fourth in Europe for employment in the photovoltaic sector, with a total of 76,000 workers. Only Germany (154,000 direct and indirect jobs), Poland (113,000), and Spain (91,000) have more. What stands out at the national level is Italy's annual growth rate. In 2022, the Italian photovoltaic workforce counted 41,911 employees.
