

Is Montenegro a leader in rooftop solar energy?

In recent years, Montenegro, a small country on the Adriatic coast, has become an unexpected leader in rooftop solar energy. With more than 2,000 hours of sunshine per year, the country's natural potential has always been evident, but innovative policy design has truly driven adoption.

Does Montenegro need solar power?

In effect, Montenegro has ensured that the benefits of solar power - lower energy costs, protection from market volatility, and environmental gains - are available to those who need them most, but not only to affluent early adopters.

Is Montenegro a prosumer country?

Almost 70 MWp of rooftop solar capacity has been installed, making Montenegro a regional frontrunner in prosumer deployment. However, instead of leaving solar energy to wealthier households able to afford panels, Montenegro created a financing model that requires no upfront payments.

Will Montenegro's rooftop photovoltaics transform Red III?

Montenegro's nationwide rollout of rooftop photovoltaics, with thousands of prosumers integrated into the grid, illustrates precisely the kind of transformation envisaged in RED III. By early 2025, the rooftop capacity had approached 70 MW, with projections pointing to 100 MW by the end of the year.

Montenegro is set to install approximately 100 megawatts (MW) of solar panels on rooftops across the country by the end of 2024, President Milo ?ukanovi? announced. The initiative is part of ...
