

New Zealand Container Power Company

Which New Zealand port has an electric ECH & a charger?

Port of Auckland, New Zealand's largest import port, will procure an electric ECH and its charger, and will set up the infrastructure for its operation. Port of Auckland currently has six diesel empty container handlers.

Can electric empty container handlers help reduce New Zealand's ports' emissions?

The country's first electric empty container handlers are set to support lowering New Zealand's ports' emissions. New electric empty container handlers promise to play a key role in decarbonising two of New Zealand's largest ports, in the latest round of successful applications from EECA's Low Emission Transport Fund (LETF).

How many electric container handlers does the port of Auckland have?

Port of Auckland currently has six diesel empty container handlers. It estimates replacing one of its diesel ECHs with an electric model will reduce the port's greenhouse gas emissions by minimum 670,977kg CO₂e over 10 years.

Can electric empty container handlers decarbonise New Zealand's largest ports?

New electric empty container handlers promise to play a key role in decarbonising two of New Zealand's largest ports, in the latest round of successful applications from EECA's Low Emission Transport Fund (LETF).
