

New Zealand Hybrid Energy Storage Project

Paris, January 10, 2023 - Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

New Zealand's first super-sized grid-connected battery - built at a cost of \$186 million - will help improve Northland's energy resilience in future power outages, Meridian Energy says.

A 179 MW solar farm and 100 MW / 200 MWh battery energy storage project planned for the North Island of New Zealand has won approval from an independent panel, with a commercial ...

New Zealand 's Environmental Protection Authority (EPA) has issued resource consents for a utility-scale project combining a 179-MW solar park with a co-located battery energy storage ...

New Zealand's first utility-scale battery energy storage system has commenced operation with electricity distribution company WEL Networks confirming that its 35 MW/35 MWh Rotohiko...

"New generation and storage projects in the final commissioning stage have grown year-on-year from 1.5 gigawatts (GW) as at the March quarter last year to 7 GW in 2025, highlighting investment ...

The New Zealand Farm Hybrid Project is a renewable energy solution integrating solar photovoltaic generation with battery energy storage to support agricultural operations in New Zealand.

The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme at Lake Onslow ...

New Zealand's energy storage investments create opportunities for businesses and communities alike. From grid-scale pumped hydro to commercial battery systems, these technologies enable reliable ...

Ruakaka Energy Park combines a 100-megawatt battery energy storage system (BESS), currently under construction, and a proposed 120-megawatt solar farm located near Marsden Point in Whangarei.
