In the specific case of throw, `throw new()` is a shorthand for `throw new Exception()`. The feature was introduced in `c# 9` and you can find the documentation as Target-typed new expressions. ...

It is NOT "bad" to use the `new` keyword. But if you forget it, you will be calling the object constructor as a regular function. If your constructor doesn't check its execution context then it won't notice that "this" ...

The `new` operator uses the internal `[[Construct]]` method, and it basically does the following: Initializes a new native object Sets the internal `[[Prototype]]` of this object, pointing to the Function prototype ...

According to this reference for operator `new`: Global dynamic storage operator functions are special in the standard library: All three versions of operator `new` are declared in the global ...

Is traction control new or did I just miss those settings? I have a 24 WR250F with the comp ECU and programmer. In the us the wr250 just got the powertune app and traction control for ...

A new expression is the whole phrase that begins with `new`. So what do you call just the `"new"` part of it? If it's wrong to call that the `new` operator, then we should not call `"sizeof"`; the `sizeof` ...

`new()` describes a constructor signature in typescript. What that means is that it describes the shape of the constructor. For instance take `{new(): T; }`. You are right it is a type. It is the type of a class ...

The `new` keyword in JavaScript can be quite confusing when it is first encountered, as people tend to think that JavaScript is not an object-oriented programming language. What is it? What problems ...

Note that if you declared `var a = new { };` and `var o = new object();`, then there is one difference, former is assignable only to another similar anonymous object, while latter being object, it ...
