

News on photovoltaic energy storage policy

A report from Wood Mackenzie identifies five key trends that will define the energy storage industry in 2026, including supply chain restructuring and the rise of non-lithium batteries.

As the United States grapples with shifting political winds, developers in the distributed solar and storage market are facing a potential policy storm.

Discover the recent developments in the United States solar industry, including new capacity and upcoming policy challenges.

Get the latest updates on battery tech, grid-scale storage & green energy - with trusted news, trends & expert commentary

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage ...

SEIA has released a policy blueprint which it claims would "strengthen the reliability of America's electric grid with solar and storage."

A team from Open Energy Transition discusses the benefits of open energy system modelling in assessing resources, including energy storage of varying durations.

SEIA has a new policy agenda centered on electric reliability in the United States. The new policy agenda details actions for local, state and federal leaders to take to strengthen the US...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

-- Today the Solar Energy Industries Association (SEIA) is unveiling a new policy agenda that details the critical actions that local, state, and federal leaders must take to strengthen the ...
