

Outdoor power supply that can generate electricity

Why do you need a portable power station?

Why Trust Us? Portable power stations are handy for backup power during outages, off-grid electricity for an RV, or simply charging your laptop and phone while working remotely. They're effectively large bundles of rechargeable lithium-ion batteries, which provide a quiet, exhaust-free alternative to noisy gas-powered portable generators.

How do I choose a portable power station?

A portable power station's maximum output tells you the total watts it can produce, which determines what you can and can't power with it. Look for a power station that can handle the combined wattage of the electronics you plan to plug into it.

How many Watts Does a portable power station have?

We recorded an impressive 92 percent of its listed 2,073.6-watt-hour capacity, well over the 85 percent average for most portable power stations. It also boasted a quick recharge time for its capacity, going from 0 to 80 percent in 81 minutes and to full in just 107 minutes.

Do portable power stations have a weather rating?

However, other portable power stations do not have a weather rating, so it's important to check if you plan on using your power station outdoors. Regardless, it's a good idea to protect your power station from any water or severe weather conditions as much as possible.

Portable power stations are handy for backup power during outages, off-grid electricity for an RV, or simply charging your laptop and phone while working remotely.
