

Photo of solar power generation installed on balcony of building

Is balcony solar off-grid?

If you want to brag about your new "Balcony Solar" install, it's true that any device connected to the power station is "off-grid". If you have a monitoring system, you can track your power generation, and leverage peak charging times with extra sun exposure. Most importantly, enjoy the empowering feeling of making your own power!

Why should you choose a balcony PV system?

Balcony PV system avoid these restrictions, and make better utilization of space. Especially for tenants, its rapid installation and disassembly are more convenient. By using a small plug-in solar power plant, you can produce your own solar power and be a model towards climate protection and energy transition!

How does balcony solar work?

Just plug in! It's really that easy. "Balcony Solar" is a totally independent power system, so to use it you'll need to plug your devices directly into the portable power station and it basically operates like a giant battery. Remember, every watt of electricity you generate from here is free fuel for your favorite device!

How to install solar panels on a balcony?

Solar Panels: You will need 4*400W Solar panels. These panels are about 2 meters long and about 1 meter wide. Mounting brackets: The photovoltaic panels will need suitable mounting brackets to fix them. Choose an installation kit suitable for the size and structure of your balcony and ensure they can accommodate 400W panels.
