What is the first solar photovoltaic park in Havana?

HAVANA TIMES - On February 21, 2025, the first solar photovoltaic park was inaugurated, with a capacity of 21.8 MW. The project, located in Cotorro--on the outskirts of Havana--is part of the island's government's bet on solar energy to address the country's dire electricity situation.

How many photovoltaic parks are there in Cuba?

Cuba's Energy and Mines Minister Vicente de la O Levy has outlined an ambitious buildout of 92 photovoltaic parks totaling approximately 2,000 MW, with 55 of those parks expected to come online in 2025 and a monthly commissioning schedule designed to add capacity steadily.

How many solar parks will Cuba build by 2025?

The Cuban government's plan is to install 55 solar parks similar to the one in Cotorro by 2025. The total capacity will be 1,200 MW. These are part of a broader project running until 2028, which aims to build 92 parks, with the goal of adding more than 2,000 MW to the National Electro-Energy System.

Is Cuba pursuing a solar transition in isolation?

Cuba is not pursuing its solar transition in isolation. Chinese firms have supplied panels and technical support for several photovoltaic projects, and officials have highlighted clean energy as a pillar of bilateral cooperation.

In a period of two years, Cuba intends to install a thousand megawatts of photovoltaic energy through two projects that began in 2024. Currently, Prensa Latina indicates, there are 26 ...

Cuba is not pursuing its solar transition in isolation. Chinese firms have supplied panels and technical support for several photovoltaic projects, and officials have highlighted clean energy as ...

The Cuban government has announced the sale of photovoltaic systems to the population for 75,200 Cuban pesos. The sales and installation are being conducted by the state-owned ...

The energy situation in Cuba is critical. The Cuban electrical system has suffered for years due to a lack of investment, aging infrastructure, and difficulties in obtaining fuel. First published in ...

Cuba launches new solar parks aiming for 2,000 MW by 2028, tackling energy crisis with Chinese-backed tech and renewable energy investments.

The Cuban government announced that before the end of 2025, there will be 51 photovoltaic parks operating in the country, of which 32 are already synchronized with the National ...

That's Cuba today. With aging infrastructure and reliance on imported fossil fuels, the country is turning to solar photovoltaic power plant systems as a golden opportunity. Did you know Cuba receives over ...

Cuba has finished building 130 MW of solar capacity across five locations, with each plant featuring 21.8
