

Photovoltaic scraper strip

How to strip solar cables properly - key requirements, common challenges, and the best tools for efficient and safe installation.

Stripping device for cross-sections 0.2 / 0.3 / 0.8 / 1.5 / 2.5 / 4 mm²;. Simplified insertion of single wires for stripping using location ridges. With opening spring and locking device. Easy insertion of coax ...

This specialist cable stripping tool is designed specifically for the needs of the photovoltaic sector. Based on the popular ErgoStrip[®], the new version has been reworked with solar installations ...

Unlike conventional metal tools, fiberglass photovoltaic scrapers act like a Swiss Army knife for maintenance crews. Their unique composition solves multiple operational challenges: "After ...

With the handy and easy-to-use cable stripper PV-Strip, solar cables with a cross-section of 1.5-16 mm²; can be prepared effortlessly and fast for the connection to the corresponding PV ...

The Swanstrom 30199 quick and precise stripping of solar cables from 1.5 - 16 mm (16 - 6AWG). The length stop can be adjusted accurately to the millimeter from 5 to 26mm to suit any solar connector. ...

In this video, we showcase the Knipex ErgoStrip PV - the ultimate tool for fast, precise stripping of PV solar cables.

The PV Strip from Jokari is the ideal stripping tool for solar and photovoltaic cables with a stripping range of 2.5 to 6.0 mm²;

KNIPEX ErgoStrip[®]; PV For fast and precise stripping of PV cables with 4 and 6 mm²; (e. g. H1Z2Z2-K) and all common round and damp-proof installation cables (e.g. NYM cable 3 x 1.5 mm²; up to 5 x 2,5 ...

The ErgoStrip PV is the latest addition, designed to handle the specific challenges of photovoltaic installs. Based on the KNIPEX ErgoStrip but engineered specifically for photovoltaic ...
