How much does a solar panel cost?

Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system components.

What is residential solar PV?

Residential solar PV refers to home solar power systems that generate electricity using photovoltaic (PV) panels. The solar price for residential installations depends on factors like system size, installation costs, location, and available incentives.

How much does a PV panel cost in 2025?

Understanding the complete PV panel prices helps you make informed decisions. In 2025, solar cell prices for residential users range from \$2.80 to \$3.80 per watt, but this can vary by the location and size of the system, as well as the complexity of the installation.

What is commercial solar PV?

Commercial solar PV refers to solar photovoltaic (PV) systems installed on businesses, offices, factories, and other commercial properties to generate electricity. The solar price for commercial projects varies based on system size, location, energy needs, and available incentives.
