

Raising pigeons under photovoltaic panels

How to stop pigeons from nesting under solar panels?

It is another way to stop pigeons from nesting under solar panels. Pigeons fear predatory birds like owls, falcons, crows, etc. You can use the fear by keeping plastic decoy predatory birds in your roofs or solar panels. Choose the ones with automatic head swiveling.

Why are pigeons attracted to solar panels?

Pigeons are attracted to solar panels due to their suitability like being safe from direct sun, rain, sufficient airflow, and no one disturbing them. Those solar panels are installed on a tile roof, pigeons love to make a nest under such panels. This is because tiles are pretty good materials and easy to make nests.

Can pigeon droppings damage solar panels?

Acidic pigeon droppings, a.k.a. guano, can accumulate on the solar panels causing damage to the glass. This debris, if not professionally cleaned often, will not only impact the solar panels' ability to generate energy and result in a higher true-up bill, but will also expedite the wear and tear of your expensive solar panel investment.

Do pigeons roost under solar panels?

Applying repellents where pigeons frequently roost and perch can be very effective in harmlessly preventing pigeons roosting under solar panels. The repellent creates a sticky layer that adheres to the birds' feet when they attempt to land. This causes irritation and discomfort. It discourages them from returning to the area.
