

Renting solar panels to others

Can you lease solar panels?

Leasing solar panels is like leasing a car: you don't own the solar panels, but you do get to use the solar energy they produce for a fixed monthly payment to the solar company. Solar lease payments are typically designed to be lower than your pre-solar electricity bill, so you'll still see savings every month.

Are solar panels a lease or a PPA?

Maintenance: If you choose a solar lease or PPA, the leasing company owns the solar panel system and typically offers a service program to cover any maintenance issues that arise during the lease term. On the other hand, if you take out a solar loan to purchase your system, you'll be responsible for its maintenance.

Is solar leasing a good option?

As with any solar financing option, solar leasing comes with its share of pros and cons: As long as your contract is structured competitively, solar leases should reduce your monthly energy costs compared to what you'd pay your utility company.

How much does a solar lease cost?

Solar lease payments usually range from \$75 to \$200 per month, depending on the number of solar panels installed and local electricity costs. Most solar lease agreements have terms of 25 years, with an option to either renew the contract, purchase the system, or remove the solar panels at the end of the term. How does a solar lease work?

A solar lease lets you enjoy clean, reliable power without the upfront cost or long-term maintenance of ownership.

Explore solar leasing for businesses, how it works, and whether renting solar panels is a cost-effective alternative to buying or financing.

Find out how a solar panel lease works and what it means for long-term savings.

Solar leasing is a way to get solar power by renting instead of buying solar panels. Homeowners make monthly lease payments. A solar lease can disrupt a home sale.
