

Solar Photovoltaic Panel Connection

What is a solar panel connection?

Solar panel connection is a key part of any photovoltaic system, determining how solar panels deliver power to the rest of the system. Installers typically choose between series or parallel solar panel wiring, depending on the desired system voltage, current output, and inverter compatibility.

How do I connect solar panels in series?

Connect solar panels in series by following the steps in our "wiring solar panels in series" section. Connect solar panel strings in parallel by using a connector known as MC4 T-Branch Connector 1 to 2, following steps similar to those in our "wiring solar panels in parallel" section.

What is solar panel wiring in series?

Solar panel wiring in series is one of the most common solar panel connection methods, especially when higher system voltage is needed. In a series connection, each solar panel's positive terminal connects to the next panel's negative terminal, similar to how older strings of Christmas lights were wired.
