

# Solar Photovoltaic Power Generation Contract Purchase

What is a solar power purchase agreement (PPA)?

But there is another model gaining popularity: the solar power purchase agreement (PPA). Under a solar PPA, you get the benefits of solar electricity without owning the system. Instead, a solar company builds, owns, and maintains the system, and you agree to buy the electricity it produces at a set rate.

Do you need a solar power purchase agreement?

Many homeowners, businesses, schools, or nonprofits exploring solar energy think of buying a solar array outright. But there is another model gaining popularity: the solar power purchase agreement (PPA). Under a solar PPA, you get the benefits of solar electricity without owning the system.

What is a power purchase agreement (PPA)?

Request a meeting What is a PPA? A Power Purchase Agreement (PPA) is a contract between an energy buyer and seller to purchase energy generated by a renewable asset- whether the asset already exists or is planned. PPAs can be signed for a short-term period, which is usually defined as 2 to 5 years, or a long-term period between 5 and 20 years.

Do solar projects need an EPC contract?

In our experience, most utility-scale solar projects use an EPC Contract. An operation and maintenance agreement: This is usually a medium- to long-term Operating and Maintenance Agreement (O&M Agreement) with an Operator. The term of the O&M Agreement will vary from project to project.

What Is A Solar Power Purchase Agreement (Sppa)? How Do SPPAS Work? Sppas, Renewable Energy Certificates, and Green Power Partnership Eligibility Additional Resources A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider for a predetermined period. See more on epa.gov.
