

Solar Photovoltaic Power Generation Teaching Materials

Data driven lessons and activities to support and incorporate installed photovoltaic systems into the classroom learning environment.

Our learning materials bring children and young people of all ages and all areas ...

A collection of lesson plans, trainings, and solar curricula ideas for educators.

There are a multitude of resources available on the basics of solar energy for all age groups. This section contains a curated list of videos that provide ...

A collection of resources for the photovoltaic educator. As solar cell manufacturing continues to grow at a record-setting pace, increasing demands are placed on universities to educate students on both ...

Access free solar energy courses, webinars, and resources from Solar Energy International (SEI). Learn PV basics, math skills for solar professionals, industry ...

Bring the power of solar energy into your classroom with engaging, ready-to-use lessons designed to inspire and educate. From interactive STEM activities to real-world data analysis, these resources ...

Access a wide range of support materials for teaching solar energy in trade schools, community colleges, and universities.

Students may know a little about solar energy, as some of their homes may use solar panels for heating or cooling purposes. The following projects allow students to set up their own investigations and ...
