# Solar perpetual motion machine power generation

Can a perpetual motion machine create energy?

A perpetual motion machine cannot create energyas it would violate fundamental laws of physics governing energy conservation. Such devices,based on the concept of perpetual motion,are theoretically impossible due to established scientific principles. Successful perpetual motion machines have not been proven feasible through scientific consensus.

What is a perpetual motion based energy device?

Another scheme of perpetual motion based energy device is using a flywheel. The first application of flywheel is the potter's wheel. Flywheel is a simple mechanical energy storing device where kinetic energy is stored in a spinning mass.

What is Perpetual Motion Machine (PMM)?

One of the ideas that has been researched nowadays is a scheme called Perpetual Motion Machine (PMM) . Perpetual Motion Machine (PMM) has been observed by many enthusiasts. The energy becomes free only when we don't have to pay for the power generation.

What are the benefits of perpetual motion based energy devices?

Moreover,perpetual motion based energy devices are able to work in all weather conditions,easy to construct and less space needed for installationthus it is suitable for houses or rural electrification. 4. Future work This idea provides a low input energy which is available for free.
