

Solar power generation projects in East China

In September 2023, the National Energy Administration proposed supporting pilot offshore PV projects in areas with favorable solar energy resources and construction conditions. China also encourages ...

China leads global utility-scale solar capacity for projects in announced, pre-construction, and construction phases. According to Global Energy Monitor's Global Solar Power Tracker, China has over 709 GW1 of ...

Solar power in China China's solar potential Wind and solar surpassed a quarter of China's electricity generation for the first time in April 2025.

CHN Energy's 1-gigawatt offshore photovoltaic (PV) project in Kenli District, east China's Shandong Province, successfully connected its first batch of PV units to the grid on Wednesday.

A large integrated solar-hydrogen farm, located in the tidal flat area of eastern China, has officially commenced operations, according to its owner, Guohua Energy Investment Co., Ltd., under...

The construction of China's largest offshore solar project to date has officially began in Lianyungang City, east China's Jiangsu Province, on Sunday.

China has achieved a milestone in renewable energy with the connection of its first 1-gigawatt offshore photovoltaic (PV) project to the power grid. This development signals a significant...

Explore China's massive solar megaprojects. Learn how gigawatt-scale photovoltaic farms in remote regions are reshaping the global energy landscape.

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

More than 720 GW of solar capacity are in development: about 250 GW under construction, nearly 300 GW in pre-construction phases, and 177 GW of announced projects, according to the Global ...
