

# Solar power plant location map

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

The map located various types of facilities, from deserts in Chile, India and north-west China, to rooftops in Germany and California, to rural installations in North Carolina and England.

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the country.

This powerful visualization tool provides real-time access to detailed information about every major power generation facility in the United States, from massive nuclear plants to small-scale ...

Data and information about power plants and their location across the globe, plotted on an Interactive world map

This template gives you an interactive map of power plants around the world. You can explore by energy source -- coal, gas, nuclear, hydro, solar, wind -- and see where and how energy is generated.

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

We show the location of the projects from our extensive database in the form of place markers on a world map. We used the resources of Google Maps to give access to user-friendly facilities for ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (&lt;1 ...

Download free solar resource maps for 200+ countries. Ideal for a general overview of solar potential. For interactive site prospecting and bankable energy yield assessments, explore our professional ...
