

Solar water pump installed on the roof

Can a solar water pump be installed on a roof?

The array could possibly be roof mounted but often the location of the solar water pump is not necessarily near a building or the building roof is shaded or not of proper materials. If the array is mounted on a roof, then the installer shall follow the relevant installation requirements as detailed in the two guidelines:

How do I install a solar water heater on my roof?

Installing a solar water heater on your roof involves several steps. Firstly, choose a south-facing location on your roof with minimal shading. Mount the solar collectors on the roof using appropriate hardware and brackets. Install the storage tank and heat exchanger near the solar collectors.
