

Stan whittingham nobel prize

In his 30-plus-year career, Whittingham has been a pioneer in the development of lithium-ion batteries, for which he won the Nobel Prize in Chemistry in 2019. He holds the original patent on the use of ...

Whittingham shared the 2019 Nobel Prize for Chemistry for inventing the lithium-ion battery.

M. Stanley Whittingham, British-born American chemist who won the 2019 Nobel Prize in Chemistry for his work in developing lithium-ion batteries. He shared the prize with American chemist John ...

In 2019, Whittingham, along with John B. Goodenough and Akira Yoshino, was awarded the 2019 Nobel Prize in Chemistry "for the development of lithium-ion batteries."

This year, the 2019 Nobel Prize in Chemistry commemorates the work of three scientists who helped develop the lithium ion battery. One of these recipients, Professor M. Stanley Whittingham, joined ...

The longtime Society member and ECS Fellow won the 2019 Nobel Prize in Chemistry for his research in developing lithium ion batteries. He shared the prize with John Goodenough and Akira Yoshino.

The Nobel Prize in Chemistry 2019 was awarded jointly to John B. Goodenough, M. Stanley Whittingham and Akira Yoshino "for the development of lithium-ion batteries"

The 2019 Nobel Prize in Chemistry has been awarded to M. Stanley Whittingham, distinguished professor of chemistry and materials science at Binghamton University, State University of New York.

Recognition for Whittingham's work came in 2019 when he, alongside John B. Goodenough and Akira Yoshino, received the Nobel Prize in Chemistry. This award honoring their contribution to the development of lithium ...
