

Texas Solar Power Station

Paris / Houston, October 24, 2023 - TotalEnergies has started commercial operations of Myrtle Solar, its utility-scale operated solar farm in the United States. Located south of Houston, ...

For the first time, Texas' ERCOT power system generated more power from solar farms than coal plants in 2025, thanks to a 185% surge in solar output since 2022.

Texas's largest solar farms, upcoming projects, and their impact on grid reliability. Texas has officially cemented its place as a national leader in utility-scale solar power.

Here is a map of all utility-scale solar farms in Texas. Hover over a solar farm to view information on each project like their name, capacity and construction date.

Solar power in Texas, a portion of total energy in Texas, includes utility-scale solar power plants as well as local distributed generation, mostly from rooftop photovoltaics. The western portion of the state especially has abundant open land areas, with some of the greatest solar and wind potential in the country. Development activities there are also encouraged by relatively simple permissi...

Enel completes GulfStar, its largest U.S. power plant, a 556 MW solar and 355 MW battery storage project in Texas delivering clean energy and local impact.

Here are some of the more prominent solar projects currently in development in Texas. From pre construction to nearing completion.

See how solar is growing in Texas with the latest data on capacity, installations, and trends shaping the state's future.

Repsol has achieved commercial operations at its 629 MW Outpost solar project, located in Webb County, Texas near Laredo, which is linked to a long-term power purchase agreement ...

Despite the current downwards spiral in energy policy, utility-scale solar power projects continue to stream into Texas, at least for the time being. The flood could soon turn into a trickle,...
