

# The closer to the solar container communication station supercapacitor

I have an `io.Reader` that doesn't require closing: `stringReader := strings.NewReader("shiny!")` And I want to pass it to a method that receives an `io.ReadCloser` func ...

Given a list of integers, I want to find which number is the closest to a number I give in input:

I would like to highlight a cell which is the closest to a specific value but still lower (below) or equal according to a formula. For instance, if I have 14 in B4, I would like the cell 13 (or 14)

How can I make my text closer to my header? Asked 4 years, 3 months ago Modified 4 years, 3 months ago Viewed 626 times

How to move one element closer to the other one. CSS Asked 13 years, 1 month ago Modified 13 years, 1 month ago Viewed 12k times

So memory latency is discrete, not continuous, and being 1 mm closer can't make it fractions of a nanosecond faster. The only plausible effect is if you socket all the memory into DIMM ...
