

# Togo's new solar panels

Togo has taken a major step forward in its renewable energy push with plans to build a 62 MWp solar power plant in Sokodé. The project, backed by a EUR26.5 million (17.4 billion CFA francs) ...

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapaong solar project will include 36,000 solar panels across 52 hectares, along ...

Togo's solar capacity reached 100 MW by 2024, boosted by the 50 MW Blitta Solar Plant, West Africa's largest when launched in 2021. Aiming for 50% renewable energy by 2025 and universal access by ...

A flagship project is the Dapaong solar photovoltaic power plant, launched in April 2025, with a capacity of 25 MWp and a storage system of 36 to 40 MWh. This energy site is capable of ...

Togo's new solar farm, co-developed by EDF and Meridiam with support from AfDB, SEFA, and Proparco, will generate 87 GWh of clean electricity annually - strengthening energy ...

Since 2020, Togo has increased its electrification rate from 52% to 69%, providing thousands of rural households electricity through solar kits and the Blitta solar power plant.

Togo is advancing its renewable energy goals with the launch of a 400 MW solar project in Kpalassi, located in the country's central region. This initiative is a central component of Togo's plan ...

Launched on April 22, 2025, the Dapaong solar plant (25 MWp, 36,000 panels) will be delivered within 13 months. Funded with USD 60M by the World Bank through RESPITE, it will power 29,000 homes, ...

Togo has launched the "Café Lumière" initiative, a solar-powered community electrification scheme, in a bid to accelerate progress towards universal energy access. The pilot phase was ...

Developed by Meridiam and Électricité de France (EDF), the project is integral to achieving Togo's 2030 goal of installing 200 MWp of renewable energy capacity, enhancing the ...
