

Tunisia makes solar modules

Currently, the British group NurEnergie (Figure 5) is planning to build the 4.5 GW TuNur solar power project in the governorate of Kebili, an integrated solar energy project linking Tunisia's sunny desert ...

As Tunisia accelerates its solar transition, selecting high-performance photovoltaic module glass becomes crucial. From durability enhancements to efficiency breakthroughs, understanding these ...

Self-generation is growing as businesses and households adopt solar. The Ministry estimates nearly 400 MW of low-voltage PV capacity installed, with 70 MW operational, highlighting ...

Tunisia is advancing utility-scale solar through a series of tenders, including the latest procurement round launched in January 2023. It previously completed a 500 MW solar tender in...

Ifrisol, based in Tunisia, has been manufacturing its solar panels since 2013, with hundreds of installations around the world. The company expanded its European operations and project pipeline...

In Tataouine, in the governorate of Tunisia that goes by the same name, a photovoltaic power plant is in operation that can reach a maximum installed capacity of 10 MW to supply more than 20 GWh of ...

This article outlines a strategic framework for establishing a solar module manufacturing facility in Tunisia through a joint venture between a private investor and a state entity.

EcoSync is accelerating clean energy in North Africa through successful solar projects in Tunisia, Algeria, and Morocco -- empowering industries with off-grid, rooftop, and irrigation solutions.

Given these favourable conditions, the productivity of solar photovoltaic systems in Tunisia is very high.

Tunisia targets 35% renewable electricity by 2030, creating stable domestic demand. Strategic position as solar export hub to Europe creates compelling manufacturing opportunities.
