

Türkiye Megawatt Solar Cells

Why is Turkey launching a solar energy program?

“We have created opportunities for global automotive companies and major vehicle manufacturers to invest in Turkey's electric vehicle sector,” President Erdogan stated. Additionally, the program includes grants of up to USD 8,000 per megawatt for cell investments to establish a 15-gigawatt capacity in solar energy.

How is Turkey attracting private investment in solar energy?

(Photo Credit: Republic of Turkey Presidency) Turkey has revealed measures to attract private investment in high-technology industries, including solar PV manufacturing. The country's President Recep Tayyip Erdogan has announced a grant support of up to \$8,000/MW for solar cell investments to establish up to 15 GW capacity in solar energy.

What is the largest Chinese solar investment in Turkey?

Their \$380 million investment in TOPCon cell production facility represents the largest Chinese solar manufacturing investment in Turkey, with technology transfer from Chint's global research centers.

What is Turkey's solar market like in 2025?

Turkey's solar market is characterized by several key trends that will shape competition and investment decisions through 2025 and beyond: Government policies mandating 70% local content for solar projects receiving incentives have driven massive manufacturing investment across the value chain.
