

# US Energy Storage Construction Plan

What is the energy storage strategy & roadmap (SRM)?

WASHINGTON, D.C. - The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE's investment in future planning of energy storage research, development, demonstration, and deployment projects.

How is battery energy storage transforming the US power landscape?

Battery energy storage is rapidly transforming the U.S. power landscape. In 2025, utility-scale battery storage is projected to expand by a record 18.2 GW, following a historic 10.3 GW added in 2024. These systems play a crucial role in balancing supply and demand, enhancing grid stability, and supporting the integration of renewable energy.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

What is the Roadhouse energy storage project?

The Roadhouse Energy Storage Project is a large-scale standalone BESS under development by NextEra Energy Resources (NEER) in Ontario, California. Designed with a total capacity of 600 MW / 2,400 MWh, the project is positioned to strengthen California's grid reliability while supporting renewable integration.

WASHINGTON, D.C. - The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies ...

US developers of large-scale battery storage stations have 18.7 GW of new capacity under construction, according to S&P Global Energy Market Intelligence data, indicating another ...

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

[City, State] - March 23, 2025 - A surge in energy storage procurement initiatives across the United States is set to dramatically reshape the nation's power grid, with utilities poised to add over 18.5 ...

The energy storage industry is planning to deliver and expand upon these investments and continue the battery manufacturing boom jump-started by rapid energy storage deployment.

Battery energy storage is rapidly transforming the U.S. power landscape. In 2025, utility-scale battery storage is projected to expand by a record 18.2 GW, following a historic 10.3 GW added ...

# US Energy Storage Construction Plan

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

The U.S. energy storage sector is expected to continue expanding after the enactment of the FY2025 Budget Act, which secures Investment Tax Credit (ITC) eligibility for storage projects ...

The United States and global energy storage markets have experienced rapid growth that is expected to continue. An estimated 387 gigawatts (GW) (or 1,143 gigawatt hours (GWh)) of new energy storage ...

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan ...
