

What does photovoltaic panel subcontracting mean

Do solar projects need an EPC contract?

In our experience, most utility-scale solar projects use an EPC Contract. An operation and maintenance agreement: This is usually a medium- to long-term Operating and Maintenance Agreement (O&M Agreement) with an Operator. The term of the O&M Agreement will vary from project to project.

What is a solar PPA?

Solar PPAs are agreements where a solar power provider installs and maintains solar panels on a host customer's property, generating electricity that is then sold to the customer. On-site PPAs involve solar panels installed directly on the customer's premises, while off-site PPAs utilize solar farms located elsewhere.

What is a subcontractor in a contract?

Subcontracting is the practice of assigning part of the obligations and tasks under a contract to another party known as a subcontractor.

Is a contract price a factor in the bankability of a solar project?

Price is also a consideration but is usually considered separately from the bankability of the contract because the contract price (or more accurately the capital cost of the solar facility) relates to the bankability of the project as a whole.
