

# Wind power generation base

The repository contains wind speeds and generation based on three different meteorological models: ERA5, MERRA2, and HRRR. Data are publicly accessible in simple csv files.

The Wind Power is a comprehensive database of detailed raw statistics on the rapidly growing sphere of wind energy and its supporting markets.

Wind power is the nation's largest source of renewable energy, with more than 150 gigawatts of wind energy installed across 42 U.S. States and Puerto Rico. These projects generate ...

The U.S. Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical ...

See how GE Vernova's Wind business is creating and manufacturing its next-generation 3 MW workhorse wind turbine, and working together with customers to electrify and decarbonize the world.

Using three different sources of data and turbine power calculated for more than 126,000 sites in the United States, the toolkit provides powerful information for the next generation of wind energy ...

Read all about the wind turbine: what it is, the types, how it works, its main components, and much more information through our frequently asked questions.

An interactive line chart showing U.S. annual wind electricity generation in billions of kilowatthours and wind energy's percentage share of total annual U.S. electricity generation in 1990 through 2022.

The USWTDB provides both onshore & offshore wind turbine locations in the United States, related facility information, and turbine technical specifications. To learn more about the app, watch our ...

Learn how a wind power generator base demonstrates proven capability in large castings and weather-resistant castings for long-term outdoor environment.
